

CONCEPT MANUAL- WALKING TILES

THE BEACH BELONGS TO EVERYONE

Walking across sand with a stroller is usually a challenge, but Walking Tiles make it simple and safe. The interlocking surface creates a stable pathway that allows a mother to move easily with her child, without sinking wheels or uneven ground. Designed for accessibility, the system ensures that families can enjoy the beach without hassle. Beyond comfort, Walking Tiles also represent a sustainable solution—reusable, durable, and environmentally friendly—making them the ideal choice for creating inclusive and responsible beach access for everyone.

TOGETHER ON EVERY PATH

She walks across the sand with ease, pushing gently on the handles of her partner's wheelchair. The wheels roll smoothly on Walking Tiles, turning what used to be an impossible journey into a simple walk by the sea. They pause for a moment, sharing a smile and the sound of the waves around them. With Walking Tiles, the beach is no longer about obstacles—it's about moments like these, where accessibility brings people closer, and every shoreline becomes a place for connection, freedom, and shared memories.
